The Business of Clinical Intelligence

**Better Information.  
Better Outcomes.  
Better Business.**

## **DO YOU HAVE THE TOOLS TO CAPTURE THE BUSINESS BENEFITS OF YOUR CLINICAL DATA?**

With reimbursement down and quality demands up, healthcare providers must leverage every opportunity to create business value. Practices must combine better care with better business.

Clinigence provides clinical business intelligence solutions to help healthcare providers derive business value from clinical data and quality patient care.

## **TAILORED TO THE EMERGING NEEDS OF HEALTHCARE PROVIDERS**

- **Accountable care organization**—the clinical business intelligence foundation for success.
- **Meaningful use** compliance and readiness for the next stages.
- **Pay-for-performance** viability assessment and value optimization.
- **Population health** and clinical outcomes management.
- **New revenue streams** and payment models.

## **UNLOCK THE BUSINESS VALUE IN YOUR PATIENT DATA**

Clinical business insight is your most important practice asset—it's the key to building successful accountable care organizations and capturing the benefits of meaningful use and value based purchasing agreements. And it is the lynchpin of quality improvement.

## CLINIGENCE— THE BUSINESS OF CLINICAL INTELLIGENCE

Clinigence is a health information technology company that helps healthcare providers derive business value from quality patient care. Clinical quality is healthcare's new business metric. We partner with healthcare providers in seizing emerging market opportunities to create business value from clinical data and quality care.

## CLINICAL INSIGHT. BUSINESS RESULTS.

Clinigence delivers visibility into practice performance patterns and the effectiveness of care protocols on patient and financial outcomes. Clinigence transforms clinical insight into a winning business strategy—putting meaningful use to work for you and providing clinical evidence to support quality and cost-efficiency improvement.

Clinigence analytics allow providers to leverage the opportunities in new payment models. Clinigence also helps providers manage operating costs and clinical outcomes more effectively. The result? **A healthier bottom line and better care for your patients.**

## FOCUS ON WHAT MATTERS MOST

The Clinigence plug-and-play platform is non-intrusive upon operational systems—it runs in the background. Practices simply document patient encounters in their electronic medical records, and Clinigence does the rest.

Clinigence is a secure, scalable, and interoperable collaborative software platform that works with any electronic medical record to deliver advanced data analytics, data mining, predictive modeling and business intelligence tools—turning patient data into meaningful information that drives improvement in clinical and financial outcomes.

## MEANINGFUL USE— MEANINGFUL TO YOUR BUSINESS

Contact us today at **678.466.6650** or **[info@clinigence.com](mailto:info@clinigence.com)** to discuss what **meaningful use** can mean to **your business!**
