

Driving Successful Accountable Care Practices

MAXIMIZE VALUE-BASED PAYMENT...

Clinigence can help you maximize revenue and manage the risks associated with a spectrum of new payment models, including:

- Meaningful use (MU) stage 1 and beyond.
- Pay-for-performance (P4P)
- Patient-centered medical home (PCMH)
- Value based purchasing (VBP)
- Shared savings (one and two-sided)
- Bundled and global payment

...THROUGH BETTER CARE PROCESSES

Clinigence leverages your clinical data to help you develop better care processes:

- Standardize care by improving compliance with guidelines across your provider network.
- Improve outcomes by pushing more effective care processes.
- Identify best practices through innovation, collaboration and learning.
- Achieve clinical integration and coordinate care across practices.

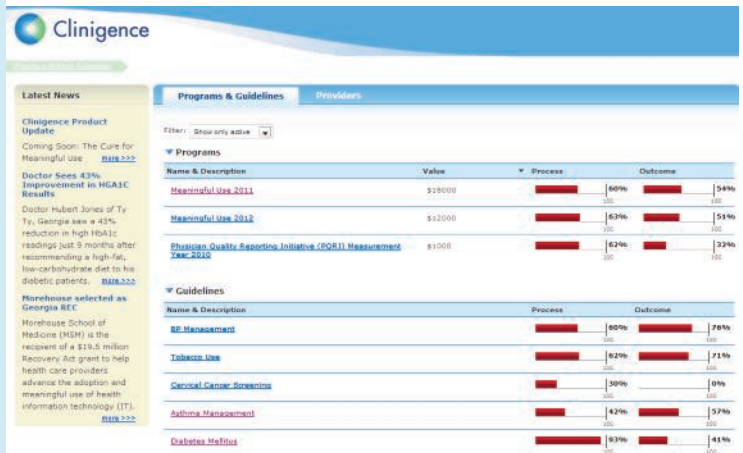

A snapshot of practice compliance with select P4P

TRYING TO GET TO ACCOUNTABLE CARE?

Accountable care is not a destination. It is a journey. The longer you are on it, the better you become, so there is no time to waste. We all know the triple aim direction: better patient care, better population health and lower cost. But how much do you know on how to get there?

Government regulations provide but a rudimentary map. Evidence-based guidelines, care coordination and patient centeredness offer some initial roads. But, let's face it: many of the places on your journey are still unknown and the roads—unmapped. Even where roads exist, do they fit your patients? Your providers?

At Clinigence, we are committed to equipping you with the tools to translate your clinical data into a clear path towards accountable care. Like a navigation system, our clinical process intelligence shows your current location and the direction you should take. Every step counts towards improving your care delivery processes. With Clinigence, you are never lost on the road to accountable care!

UNDER THE HOOD

DATA AGGREGATION

Clinigence aggregates data across settings (inpatient, ambulatory, homecare, etc.), EMR systems and claims to create a single, unified view of your patient population.

TURNING DATA INTO INFORMATION...

Clinigence analyzes and correlates the data with an ever-growing body of knowledge and models to produce actionable information, including:

- ◇ Compliance with evidence-based guidelines and user-defined care protocols.
- ◇ P4P program performance and ROI analysis, including a growing library of standard (e.g. MU, NQF, HEDIS) and user-defined measures.
- ◇ Process effectiveness on multiple outcome indicators, including patient safety, clinical quality, care experience, utilization and cost.

...THAT DRIVES ACTION

Clinigence helps identify and prioritize issues and opportunities to improve care. Real-time data transparency fuels and guides effective action.

HARNESSING COLLECTIVE WISDOM...

Clinigence allows users to participate in the accumulation of knowledge related to care process. Guidelines, measures and interventions can be shared. More importantly, process effectiveness to specific populations can be aggregated and shared. The result: a learning system where users continuously benefit from and contribute to the collective body of best practices.

...AND ECONOMIES OF SCALE

The Clinigence Software-as-a-Service (SaaS) model eliminates the large upfront investments typical of data analytics and business intelligence projects and makes these tools available and affordable to practices of all sizes.

ON YOUR DASH

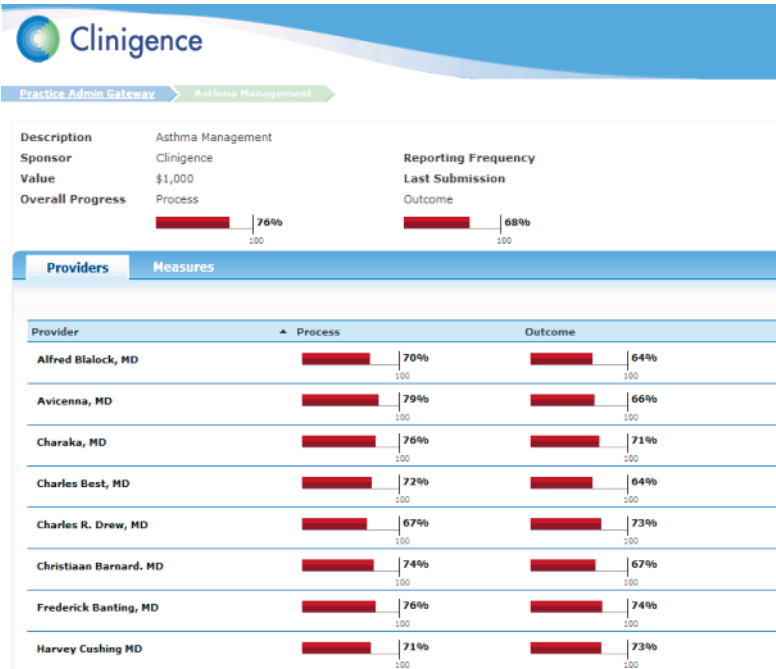

To help meet the process redesign organizational change challenge, Clinigence delivers relevant, timely and credible information in dashboards dedicated to different user groups or roles within the organization:

INDIVIDUAL PROVIDER

- ◇ Benchmark yourself against your colleagues and your organization's goals.
- ◇ Trend your performance over time.
- ◇ Track intervention effectiveness to your patients.
- ◇ Identify patients that require intervention.
- ◇ Learn from and add to your practice's collective knowledge on intervention and process effectiveness.

COMPLIANCE OFFICER

- ◇ Identify issues across your provider network.
- ◇ Track intervention effectiveness at the aggregate organizational level.
- ◇ Prioritize actions based on predicted impact and effort.

CARE PROCESS ARCHITECT

- ◇ Measure care process effectiveness relative to the organization's goals (retrospective and predictive/live).
- ◇ Design more effective and efficient care processes.
- ◇ Benefit from and add to collective knowledge base.

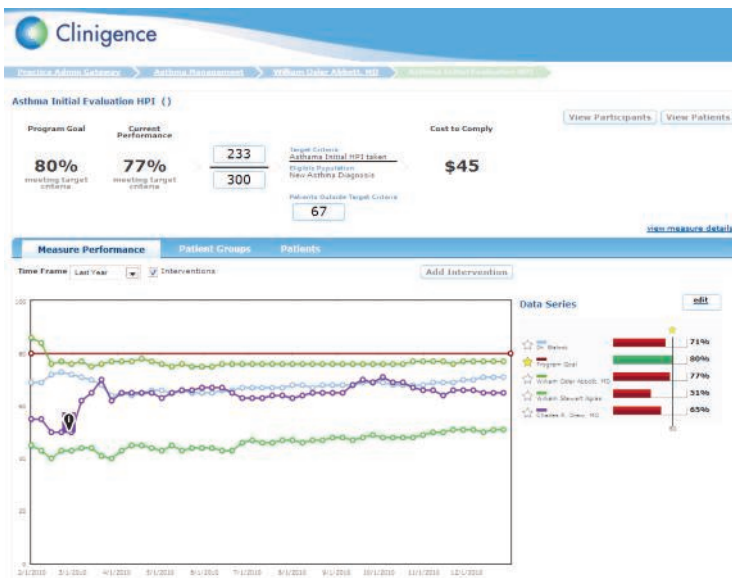

IN YOUR TOOLCHEST

BENCHMARKING

Clinigence enables comparing the performance of individual providers and practices against their peers, national benchmarks and organizational goals. Risk adjustment methods can be applied to account for variations in patient population.

TRENDING & INTERVENTION TRACKING

Real-time performance trending over time creates a feedback loop that fuels a cycle of improvement. Users can assess their progress and learn from peers as interventions are applied and tracked.

COMPARATIVE EFFECTIVENESS

Retrospectively, your historic data may uncover new insights as to which processes work and which don't. You can also design and implement simple prospective studies to compare the effectiveness of alternative approaches to your patients.

POPULATION HEALTH MANAGEMENT

With Clinigence, you can dissect your patient population to identify disparities in care process effectiveness. You can also break down your protocols into building blocks, or process steps, to gain deeper insight into process improvement. Together, these tools empower you to design better care processes for your patient population.

JUMP-START YOUR ACO JOURNEY TODAY...

No matter where you are on the road to accountable care, Clinigence can help you map your next steps. Our commitment to you is this:

1. In every step, we will help you identify and capture opportunities to derive business value from quality patient care.
2. We put your data to work for you. Any insights gained are yours to keep or share as you see fit.
3. As your trusted partner, we are committed to the success of your journey and a joint continuous process of learning and improvement.

... AT NO RISK TO YOU

For a limited time, we are offering to you to take the first step with us at no risk. Choose a single report and we will deliver it to you based on your data free of charge. We are confident that once you taste the power of our technology, you will not move towards accountable care without it. After all, would you give up your car navigation system for a paper map?

Contact us today at **678.466.6650** or **info@clinigence.com** to jump-start your journey in accountable care!
